REMOTE BOTTLE VALVE / SAFETY SHUTOFF INSTRUCTIONS

P/N 16058NOS

A5093-SNOS

INTRODUCTION

The Remote Electronic Control Bottle Valve is designed to be used as a convenient method of opening and closing the nitrous supply bottle. This valve can also be used as an emergency shutoff valve. The valve is a dual-action type that remains in position (either open or closed) until changed by the 3-way switch supplied in this kit. The solenoid does not require a constant current to hold a position, only to change a position. Install the bottle adapter in the "P" port of the solenoid and the line fitting in the "A" port of the solenoid.

NOTE: Install the Remote Electronic Control Bottle Valve onto the bottle valve tightly and wire the switch as shown above.

CAUTION! Always be sure the valve is in the closed position when the valve is not in use.

Description	Quantity	P/N
Remote Bottle Control	1	16058-S
4AN-1/4 NPT Adapter Blue	1	17970-S
660 Nut Adapter	1	16102-S
Momentary 2-Way Toggle Switch	1	15603-S
15 ft. 3-Wire Cable Roll	1	15619-S
1/4 NPT—660 Nipple	1	16110-S
Teflon Nut Washer	1	16210-S
Red Female Spade .250	6	15885R-S
Red Male Spade .250	3	15886R-S
Scotchlock	2	15891-S
1/4" Ring Terminal 16-14G	1	15882-S
