

HOOD PROTECTOR INSTALLATION INSTRUCTIONS

- 1** Raise the hood and remove the hardware that attaches the grill to the hood. Remove the grill and set it off to the side where it won't get damaged.
- 2** Pull back or remove the rubber seals on the underside of the hood that close over the headlights. Hold the hood protector up into place and make note of where the adhesive will make contact. Thoroughly clean the area under the hood with the alcohol pad where the adhesive strip will make contact.
- 3** Remove the red backing from the adhesive strip on the hood protector, carefully center it on the hood and firmly press it into place. Reinstall the factory rubber seals over the hood protector.
- 4** Reattach the grill to the hood, sandwiching the hood protector between the hood and the grill.

CLEANING YOUR HOOD PROTECTOR: USE ONLY WARM SOAPY WATER AND A SOFT CLOTH. NEVER USE PAPER TOWELS, PETROLEUM PRODUCTS, OR SOLVENTS TO CLEAN YOUR HOOD PROTECTOR!
