

Half Door Installation Instructions

For: CJ5 (1976-1983) Part Number: 53027

Congratulations on your purchasing decision. Bestop designed these Doors to give you years of dependability and performance with proper care. If you encounter any problems during the installation of your Doors, or at any later date, please contact your authorized Bestop dealer or call our Consumer Response Department, Monday - Friday, 8AM - 4:30PM (MST) at 1-800-346-3910 or (303) 465-1755 in Colorado.

WARNING

This product is designed primarily to enhance the appearance of the vehicle and to shield the occupants from ordinary weather conditions. Do not rely in any way on the components of this product to contain occupants within the vehicle, or to protect against injury or death in the event of an accident. This top will not protect the occupants from falling objects. Never operate vehicle in excess of manufacturer's specifications.

WEAR SEAT BELTS AT ALL TIMES

Read and follow, precisely, all installation instructions provided when installing top. Failure to do so may result in a poor fitting top and could place occupants of the vehicle in a potentially dangerous situation.

Installation Tips

Before you begin installing this door assembly, read all instructions thoroughly. Below are a few tips to make this installation easier.

For a smooth fit:

It is normal for fabric to contract and wrinkle when stored in the shipping carton. Within a few days after the installation, the fabric will relax and the wrinkles will disappear.

Parts List and Hardware Identification

Door, Lower - Right Qty - 1 Door, Lower - Left Qty - 1

Vertical Mount - Left, Qty - 1, Part Number 207.30

Vertical Mount - Right, Qty - 1, Part Number 207.29

Door Striker - Right, Qty - 1, Part Number 212.87

Door Striker - Left, Qty - 1, Part Number 212.88

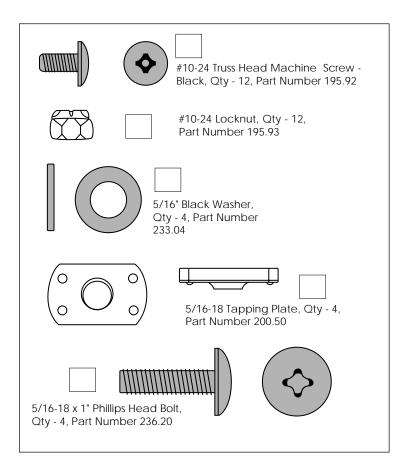

Paddle Handle Assembly, Qty - 2, Part Number 245.46

7/32", 3/32" Drill Bits Drill Motor Hammer

7/16" Wrench Phillips Screwdriver Center Punch

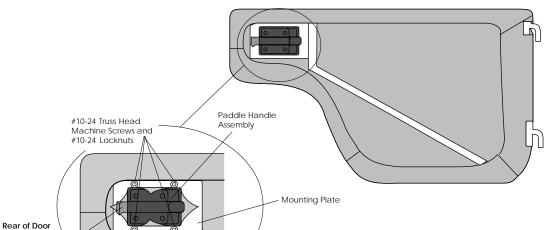

53027 pg 2

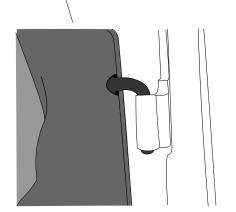

Warning:

The doors in this product are designed only for protection against the elements. Do not rely on the doors to contain occupants within the vehicle or to protect against injury during an accident. Door handles are only designed to aid in door closure. Door and handle <u>will not</u> support a person's weight.

Step One

Locate the pre-cut "X" in the lower door panel where the Paddle Handle will fit into the mounting plate on the door frame. Fold the pre-cut fabric back and insert the Paddle Handle into the mounting plate so that the latch mechanism is inside of the vehicle and the latch bolt is toward the rear of the door. Align the four holes in the Paddle Handle Assembly with the four holes in the mounting plate. Use a pointed tool to punch four holes in the fabric to match the holes in the Paddle Handle and the mounting plate. Insert four #10-24 Truss Head Machine Screws from the outside and secure them with #10-24 Locknuts. Do not tighten the screws until all four are in place. Trim the excess fabric around the Paddle Handle. Repeat for both lower doors.

Step Two

Hold the door straight out from the vehicle with the hinge pins over the body hinges. Lower the pins into the hinges. Make sure that the pins are fully inserted into the body hinges. Close the door and check all sides to make sure that it fits properly against the body.

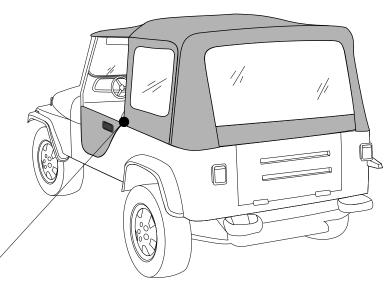

Paddle Handle

Inside of Door

Step Three

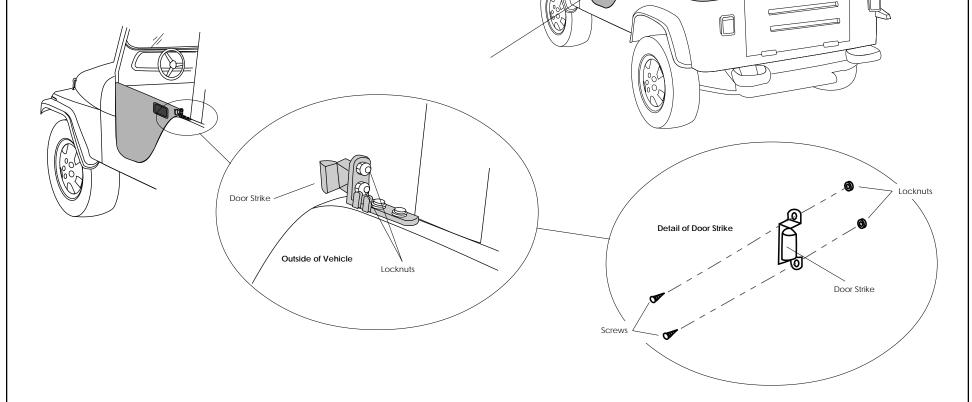

Mount the Vertical Retainer Mounts on the vehicle, just behind the door openings. Install the mounts using two 5/16-18 x 1" Phillips Head Bolts, two 5/16" Washers and two 5/16" Tapping Plates.

Step Four

Close the door against the body and place the Door Striker behind the Paddle Handle Latch with the flat surface to the inside of the vehicle and with the raised end toward the top. Install the Door Striker on the Vertical Retainer Mount with two #10-24 Truss Head Machine Screws and two #10-24 Locknuts. The Door Striker may be adjusted in or out until you are satisfied with the way the door shuts and opens. Repeat on both sides of the vehicle.

Close the door and check all sides to make sure that the door fits properly against the body. If necessary, the door may be bent slightly to fit the contour of the vehicle body. The tension of the door may be adjusted by adjusting the handle.

Care and Maintenance of your Bestop Product

Your Bestop product is made of the finest materials available. To keep it looking new and for the maximum possible wear, it will need periodic cleaning and maintenance.

Fabric: The fabric should be washed often using soap, warm water and a soft bristle brush Rinse with clear water to remove all traces of soap. Bestop recommends using Bestop Cleaner (part no. 11201-00) and Bestop Protectant (part no.11202-00) for Vinyl fabric and Bestop Twill Protectant (part no. 11207-00) for Twill fabric. Bestop Cleaner and Bestop protectant are specially formulated to provide a total cleaning and protection system. Bestop Cleaner safely removes the toughest stains, will not harm vehicle finishes, is biodegradable and environmentally friendly. Bestop Protectant protects against UV-fading, cracking and hardening, and repels dust, grease, dirt and mildew.

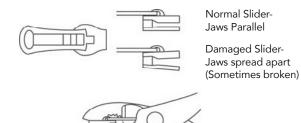

Windows: Keep windows clean to avoid scratching. DO NOT use a brush on the windows! Wash with a water-soaked cloth or sponge and a mild dishwashing detergent. Bestop recommends Bestop Vinyl Window Cleaner (part no. 11203-00), which safely cleans and protects vinyl windows and helps prevent UV damage. NEVER WIPE THE WINDOWS WHEN THEY ARE DRY. Be careful when cleaning snow or frost from the vinyl windows since they are easily scratched and may crack at low temperatures. DO NOT roll the sides or rear window in cold weather. The windows become stiff and will crack. Cracks caused by misuse in cold temperatures are not covered under warranty.

Water: Seeping through at the seams may be stopped by applying 3-M Scotchgard® on the inside of the seams.

Snaps: Keep snaps cleaned and lubricated with silicone to help prevent snaps from sticking to the studs. If a snap does become stuck to a stud, use a screwdriver and GENTLY pry apart to prevent permanent damage to the snap or the top fabric.

Zippers: Keeping zippers cleaned and lubricated with Bestop's Zipper Cleaner (part no. 11206-00) will help prevent damage and keep the zippers in smooth working condition. If a zipper opens behind the slider, the slider may have been spread apart. This problem can usually

be repaired by using an ordinary pair of pliers to bring the sides back into parallel. Return slider to the end of the zipper in the normal Open position. Squeeze lightly at first and test the zipper. If the zipper continues to remain open squeeze more firmly with the pliers and try the zipper again. Repeat this procedure until the zipper operates correctly.
