WIRING LOCATION GUIDE GUÍA DE UBICACIÓN DEL CABLEADO IDE D'EMPLACEMENT DES FILS

MUST READ FIRST!

All steps must be followed to ensure correct function of the T-Connector. To verify proper installation once installed, test by connecting a test light or properly wired trailer.

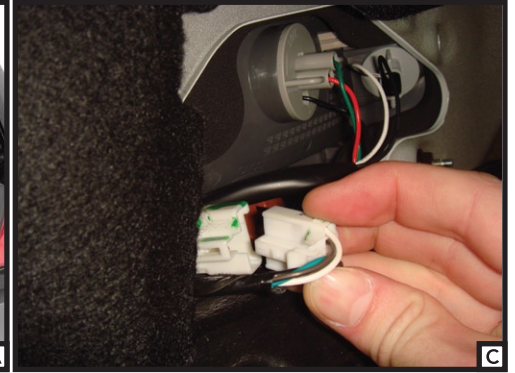

¡DEBE LEERSE PRIMERO!

Debe seguirse todos los pasos para asegurar el correcto funcionamiento del Conector-T. Para verificar la correcta instalación, pruebe conectando una luz de prueba o un remolque debidamente cableado.

À LIRE D'ABORD!

Pour assurer le bon fonctionnement du T-Connector, il faut suivre toutes les étapes. Pour vérifier que l'installation a été bien effectuée, branchez un feu de test ou une remorque correctement filéée.

English

1. Open the trunk and remove the vehicles rear scuff panel. [A] Partially remove the felt trunk liner behind the taillights in the trunk by removing the fasteners holding it in place.
2. Starting on the drivers side locate the vehicles taillight wiring harness behind the felt trunk liner. [B] The connectors on the harness will be similar to those on the T-connector harness. Separate the connectors being sure not to damage the locking tabs. [C] Insert the T-connector end with yellow wire in-between the separated connectors. Make sure the connectors are fully inserted with locking tabs in place. [D]
3. Route the T-connector end with the green wire out from behind the felt trunk liner under the removed scuff panel to the passenger side. Repeat step 2 on the passenger side using the green wire.
4. Locate a suitable grounding point near the connector such as an existing screw with nut in the vehicle's frame or drill a 3/32" hole and secure white wire using eyelet and screw provided.
5. Route the 4-flat wire to the center of the vehicle and out the trunk when in use. When not in use roll up and store in an out of the way location in the trunk.

WARNING!

Verify miscellaneous items that may be hidden behind or under any surface before drilling to avoid damage and/or personal injury.
