K&N® Cabin Air Filters replace your vehicle's stock cabin filter with a reusable design that cleans and freshens incoming air. They are electrostatically charged to grab and hold dust particles. K&N® cabin air filters help control odors while they help capture most mold, mildew, fungus, spores, bacteria and germs. When they get dirty they can be cleaned and reused and best of all, they come with a No-Hassle Lifetime Limited Warranty.

If you need any assistance please call 1-800-858-3333 to speak with a representative in our Customer Service Center before returning the product.

When applicable, refer to owner's manual for manufacturers installation/removal instructions. The following are helpful steps when replacing/servicing cabin air filter with K&N® cabin air filter.

1. Locate the rear access panel and move the rear seat forward to gain access. (Fig. 1)
2. Open, and remove, the access panel. (Fig. 2 & 3)
3. Remove the cabin filter door by pressing down on the top clip and pulling it outward. (Fig. 4 & 5)
4. Slide the dirty filter out of the housing. (Fig. 6)
5. Slide the new K&N cabin air filter into the housing. (Fig. 7 & 8)
6. Reverse steps 2-3 to complete cabin filter installation. With the cabin filter installed, clean an area on the inside of the access panel and apply the K&N Stop Decal. The decal will help notify others that this is a re-usable cabin filter.
